

# WATER IS OUR ELEMENT

**ONLY THOSE WHO SEE THE WHOLE  
CAN EXCEL IN DETAIL**

## Innovative and safe pump solutions, turbine and injection systems

For decades, Häny AG has been a household name for pump and system technology for water supply and sanitation in the municipal and industrial segments. Our know-how also leads to convincing and clear results in building services engineering as well as swimming pool technology. Offering innovative turbine solutions, Häny AG enables more efficient use of renewable water power in times of energy shortages. Last but not least, we are among the leading manufacturers of injection systems.

### **Top quality over 6 generations**

Ever since its foundation by Eduard Häny-Pfister in 1875, Häny AG has been a family business. Today the company is managed by the sixth generation of the family and employs roughly 190 staff. Over time, the company has transformed itself from a pump manufacturer into a systems provider. For the most part procuring our pumps from the global market, we are now capable of suggesting to our customers the best possible solution in specific situations. Where unusually sophisticated pumps or special solutions are called for, we continue to manufacture these in Jona.

### **Your competent services and solution**

By thinking and acting outside the box and thanks to our unique consultancy, manufacturing and servicing competence, we are able to offer the optimal solution for any product range. All from one source – reliable, custom-tailored, and safe.

### **Our own products**

- pressure dewatering pumps
- paper process pumps
- mixing and injection plants
- pelton and counter pressure pelton turbines

Individuality, cost-effectiveness, functionality and user comfort is the essence of our solutions.

**Consulting, analysis, planning and installation**

Wherever water is transported, controlled and regulated in building services engineering Häny is the right partner, be it in an advisory function or as direct contractor.

Planners, builders, and installers use our core competence for selecting the right system or product. Our specialists work with state-of-the-art calculation programmes and are sure to find the best solution for your request too.

**Häny's building services engineering offers:**

- analysis, planning and installation in all areas of building services engineering
- water systems and components for transporting drinking, heating, cooling, industrial and rain water
- waste water systems and components for drainage and transportation of sewage and waste water

**Häny customers secure advantages through:**

- a cost-efficient and optimally working system
- minimal operating costs and safe plants
- high availability thanks to short delivery times
- high competence of the system provider

# BUILDING SERVICES

Innovative building services engineering keeps everything flowing

Water is the  
lifeline of every  
community

# MUNICIPAL / INDUSTRIAL

Engineering is our source for optimal water circulation systems within municipalities and companies.

**Optimal concepts for custom-tailored systems**

Due to their complexity, municipality and industrial projects are always a challenge for our system engineers. The decisive factor is optimal system configuration, be it in the area of drinking water supply and wastewater technology. Custom-tailored systems are developed and optimised in cooperation with you.

**Häny's municipal and industrial services offer:**

- comprehensive advice and services
- customised solutions
- delivery, installation and start-up
- sprinkler systems and pressure damping systems
- pumping stations for drinking, sewage or waste water or for water treatment

**Häny customers secure advantages through:**

- great work efficiency and workmanship quality thanks to extensive experience
- competent advice and clear responsibilities
- safety through sound water hammer calculations
- cost-effective solutions thanks to specially adjusted systems
- low expense for coordination and administration

Customised PE products from a state-of-the-art production line.

**Optimum solutions for PE chambers**

Everything from a single source and of the highest quality. PE chambers are produced to measure with a high degree of automation and equipped with matching pumps. These are supplied as complete units and are only positioned and connected on-site.

**Plastics and construction engineering from Häny:**

- PE pump chambers, Sludge collectors
- Manholes, Cable loop chambers
- Retention chambers, Valve chambers
- Chamber within a chamber, Special structures

**Häny customers benefit from advantages:**

- 10-year leak-tightness warranty
- Customised processing
- Simple and clean handling
- More economical than concrete products

# PLASTICS AND CONSTRUCTION ENGINEERING

The right solution  
for every need

Renewable  
energies are a  
sign of the times

# T U R B I N E S

With energy production from drinking and waste water,  
we contribute to finding environmentally friendly power sources.

**Making use of potential with the Häny power line**

Drinking water and waste water contain large yet still hardly used energy potential. With innovative technologies, it is possible and makes sense both ecologically and economically to tap into this potential. Our goal is to develop the best possible overall solution for optimal power production, always taking into account quick refinancing and correspondingly high added value.

**Häny's turbine technology offers:**

- customised solutions
- delivery installation and start-up
- counter pressure Pelton turbines
- pelton turbines
- backward running pump turbines

**Häny customers secure advantages through:**

- power generation from drinking and waste water
- power generation products for small hydroelectric power plants
- top-quality products
- innovative and durable systems
- very high degree of efficiency

When it comes to reinforcing, sealing and anchoring we do not compromise.

**Convincing systems and devices**

We are your global partner for state-of-the-art mixing and injection technology. Wherever building sites, rock, anchorages or tunnel constructions need to be reinforced or sealed we are at work.

**Häny mixing and injection technology offer solutions for:**

- ground improvement: tube injections, soil-mix procedures, injection screens
- tunnel construction: injections for reinforcing and sealing the ground, pipe screen injections, mortar back-filling injections, contact injections
- anchorages: earth and rock anchors, floor nailing, boring anchors
- ditch-free building: pipe jacking, micro-tunnelling, directional drilling
- special civil engineering: slotted and narrow wall construction, pile foundations
- pre-stressed concrete: injection of the cable channels

**Häny customers secure advantages through:**

- individual and cost-effective system configurations
- competent advice and high flexibility
- little wear and tear and low maintenance costs
- high-quality and user-friendly products

MIXING - /  
INJECTION TECHNOLOGY

State-of-the-art procedures guarantee maximum safety

**Marvellous  
water worlds  
promise a high  
quality of life**

# SWIMMING POOL TECHNOLOGY

**Our well-thought-out planning guarantees perfect swimming pools with optimal water quality.**

**Clean water for great splashing fun**

When planning, we take into account the latest insights from construction physics as well as state-of-the-art energy-saving technologies and water treatment methods. Naturally, individual requirements and standards differ to a great extent. This means that in reaching the final goal, close cooperation, accommodating the particularities of the object and taking into account the budget are all indispensable.

**Häny's swimming pool technology offers:**

- exclusive private swimming pools
- fountains, water displays
- counter current systems, massage jets
- maintenance service

**Häny customers secure advantages through:**

- advice, planning and implementation from a single source
- maintenance and repair contracts
- on-call and fault clearing service
- short access routes thanks to a tight network of service organisations
- online shop for water care products

If the service is right from advice to maintenance this means you are working with Häny.

**Permanent service availability**

We do our utmost to ensure that your system, from large plants down to the smallest component, work perfectly. We conduct new value revisions at our plant and partial revisions on site. Using the latest measuring and analysis technology, we assess the condition of your plant on site, thereby ensuring that any damage is detected in good time. Thanks to our closely-knit service point network in Switzerland, we can guarantee fast reaction times and short access routes.

**Häny customers secure advantages through:**

- advice on all maintenance and repair offers
- possibility of having remote diagnostics conducted by the internal customer service
- maintenance and repair contracts
- close-knit network for repair and revision services
- spare parts and installation service
- optimised operating costs through proactive maintenance
- on-call and fault clearing service 365 days a year

# CUSTOMER SERVICE

**Various segments,  
one philosophy –  
customer satisfac-  
tion through pro-  
fessional compe-  
tence and a strong  
customer focus**

**Our aim is not to meet your expectations,  
but to surpass them – and to enthuse you.**
